MercedCERA INVESTMENT RETIREMENT BOARD AGENDA THURSDAY, OCTOBER 22, 2020 MERCED COUNTY EMPLOYEES' RETIREMENT ASSOCIATION TELEPHONE NUMBER: 1-310-372-7549, CONFERENCE CODE: 975839

Important Notice Regarding SARS-COV-2

Based on guidance from the California Department of Public Health and the California Governor's Office, in order to minimize the spread of the SARS-COV-2 virus, MercedCERA's building will be closed to the public during MercedCERA Board meetings. Members of the MercedCERA Board will participate in this meeting offsite via conference call. Members of the public may listen to the meeting and offer public comment telephonically by calling into the telephone number provided above and entering the stated conference code. If you have any issues participating in the meeting telephonically or require reasonable accommodation for your participation, please contact MercedCERA staff at 209-726-2724.

Please turn your cell phone or other electronic device to non-audible mode or mute.

CALL TO ORDER: 8:15 A.M.

- ROLL CALL.
- APPROVAL OF MINUTES October 8, 2020.

PUBLIC COMMENT

Members of the public may comment on any item under the Board's jurisdiction. Matters presented under this item will not be discussed or acted upon by the Board at this time. For agenda items, the public may make comments at the time the item comes up for Board consideration. Persons addressing the Board will be limited to a maximum of five (5) minutes in total. Please state your name for the record.

CLOSED SESSION

As provided in the Ralph M. Brown Act, Government Code sections 54950 et seq., the Board may meet in closed session with members of its staff, county employees and its attorneys. These sessions are not open to the public and may not be attended by members of the public. The matters the Board will meet on in closed session are identified below. Any public reports of action taken in the closed session will be made in accordance with Government Code sections 54957.1.

(1) CONFERENCE WITH LEGAL COUNSEL – SIGNIFICANT EXPOSURE TO

LITIGATION pursuant to paragraph (2) or (3) of subdivision (d) of section 54956.9: 1 case.

OPEN SESSION

Report on any action taken in closed session.

BOARD ACTION¹/DISCUSSION

Pursuant to Govt. Code § 31594 and MercedCERA's Investment Objectives & Policy Statement due diligence analysis requirement:

- 1. Discussion and possible action on any funds/managers and annual capital budgets overview for alternative investments Cliffwater.
- 2. Discussion and possible action on performance update for September of 2020 with possible action on any funds or managers Meketa Group.
- 3. Discussion and possible action to appoint an ad hoc subcommittee to work with staff on MercedCERA's staffing and planning Chair.
- 4. Discussion and possible action to approve requested pay code as non-pensionable for Merced County Staff.
- 5. Discussion and possible action to appoint Plan Administrator as the SACRS Fall Conference Voting delegate Staff.
- 6. Review calendar of any training sessions and authorize expenditures for Trustees and Plan Administrator. Pursuant to Govt. Code § 31522.8 and MercedCERA's Trustees Education and Training Policy requirements. Examples of upcoming training and educational sessions:

a. SACRS Fall Conference, November 10 - 14, 2020 (virtual conference).

INFORMATION ONLY

MercedCERA UPCOMING BOARD MEETINGS

Please note: The MercedCERA Board Meeting and/or Education Day times and dates may be changed in accordance with the Ralph M. Brown Act by the MercedCERA Board as required.

- November 12, 2020 (Administrative and Investment Meeting)
- December 10, 2020 (Administrative and Investment Meeting)

ADJOURNMENT

All supporting documentation is available for public review online at **www.co.merced.ca.us/retirement**

Any material related to an item on this Agenda submitted to the Merced County Employees' Retirement Association, after distribution of the Agenda packet is available for public inspection at www.co.merced.ca.us/retirement

Persons who require accommodation for a disability in order to review an agenda, or to participate in a meeting of the Merced County Employees' Retirement Association per the American Disabilities Act (ADA), may obtain assistance by requesting such accommodation by emailing the Merced County Employees' Association at MCERA@co.merced.ca.us, or telephonically by calling (209) 726-2724. Any such request for accommodation should be made at least 48 hours prior to the scheduled meeting for which assistance is requested.

¹ "Action" means that the Board may dispose of any item by any action, including but not limited to the following acts: approve, disapprove, authorize, modify, defer, table, take no action, or receive and file.

MercedCERA ADMINISTRATIVE & INVESTMENT RETIREMENT BOARD MINUTES THURSDAY, OCTOBER 8, 2020 MERCED COUNTY EMPLOYEES' RETIREMENT ASSOCIATION TELEPHONE NUMBER: 1-310-372-7549, CONFERENCE CODE: 975839

CALL TO ORDER: 8:15 A.M.

Board Members Present (roll call): Ryan Paskin, Scott Johnston, Al Peterson, David Ness (arrived at 8:18am), Michael Rhodes, Karen Adams, Janey Cabral, Jason Goins and Kalisa Rochester (arrived at 8:36am). **Counsel:** Jeff Grant. **Staff:** Kristen Santos, Martha Sanchez, Mark Harman, Ninebra Maryoonani, Brenda Mojica, Sheri Villagrana and Alexis Curry.

APPROVAL OF MINUTES –September 24, 2020. **MercedCERA Board voted unanimously via roll call vote to approve the September 24, 2020 meeting minutes. Peterson/ Silveira** U/A (7-0) (Trustee Goins abstained himself from vote due to not being present for the meeting on September 24, 2020.)

PUBLIC COMMENT

No Comment.

CLOSED SESSION

- Discussion and possible action to adopt the recommendation to invest in one Fund/Manager – Cliffwater.
 The MercedCERA board voted via roll call vote to invest \$6 million in Kholsa VII and \$2 million in Kholsa Seed Fund pending legal review of all funds.
- 2. Disability update no action taken.

CONSENT CALENDAR

Consent matters are expected to be routine and may be acted upon, without discussion, as one unit. If an item is taken off the Consent Calendar for discussion, it will be heard as the last item(s) of the Board Action/Discussion as appropriate.

RETIREMENTS: Pursuant to Govt. Code § 31663.25 or § 31672

All items of earnable compensation for service or disability retirements listed below are in compliance with the pay code schedule approved by the Board of Retirement. The retirement is authorized; however, administrative adjustments may be necessary to alter the amount due to: audit, late arrival of data, court order, etc.

a.	De La Cerda, Charles	Beh. Health	1 Yrs. Svc. Eff. 09/16/2020
b.	Robertson, Zachary	Probation	23 Yrs. Svc. Eff. 09/26/2020
c.	Daniel, Autumn	Courts	17 Yrs. Svc. Eff. 09/11/2020
d.	Porras, Reyes	DPW	5 Yrs. Svc. Eff. 07/31/2020

YTD fiscal year 2019/2020 retirees: 22 YTD fiscal year 2018/2019 retirees: 101 YTD fiscal year 2017/2018 retirees: 082

REFUND OF SERVICE PURCHASE: None **DEATH BENEFIT:** None **MONTHLY BUDGET REPORT:** Submitted.

The MercedCERA board voted unanimously via roll call vote to approve the consent calendar. Adams/Silveira U/A (9-0)

BOARD ACTION¹/DISCUSSION

 Discussion and action to approve Emergency Preparedness Contract with Macias Gini & O'Connell (MGO) for Process, Procedures and Personnel Services – Staff.

The MercedCERA board voted via roll call vote to approve the Plan Administrator to negotiate a contract with MGO for the proposed scope.

Silveira/Goins (8-1)

Trustee Adams voted no.

2. Discussion and possible action on Legislative Report (this is the last legislative report due to retirement of the consultant) – Staff.

No action taken.

- 3. Review calendar of any training sessions and authorize expenditures for Trustees and Plan Administrator. Pursuant to Govt. Code § 31522.8 and MercedCERA's Trustees Education and Training Policy requirements. Examples of upcoming training and educational sessions:
 - a. CALAPRS Administrators Institute September 25, 2020 (Plan Administrator only virtual conference).

The MercedCERA Board voted unanimously via roll call vote to approve the Plan Administrator to attend the CALAPRS Administrators Institute. Peterson/Silveira U/A (9-0)

- b. CALAPRS Trustee Round Table October 23, 2020 (virtual meeting).
- c. SACRS Fall Conference, November 10 14, 20, 20 (virtual conference).

INFORMATION ONLY

Trustee Jason Goins will be retiring after January 1, 2021 and the MercedCERA December 10, 2020 meeting will be his last. He will not be re-running for Safety Seat due to his retirement.

Plan Administrator thanked Trustee Goins for his service and dedication to MercedCERA.

ADJOURNMENT

The meeting adjourned at 9:43 A.M

Respectfully submitted,

¹ "Action" means that the Board may dispose of any item by any action, including but not limited to the following acts: approve, disapprove, authorize, modify, defer, table, take no action, or receive and file.

Ryan Paskin, Chair

Al Peterson, Secretary

Date

Private Asset Capital Budget Update Merced County Employees' Retirement Association

October 22, 2020

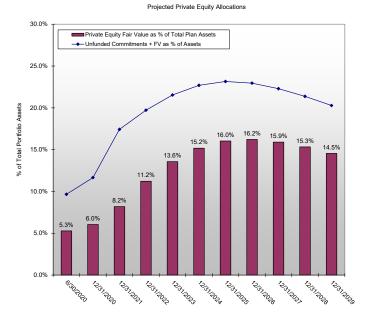

MCERA Private Equity Capital Budget & Implementation Plan

15% fund level target; an increase from 9% in 2018

- Keep annual capital budget target of \$40 million
 - Range of \$30-\$50 million
- Target 4-7 investments, range of \$5-\$15 million per inv; average size of \$8 million per
- Forecasted to reach the targeted level in 5 years
- Targets for strategy exposures remain the same
- Update capital budgets on an annual basis

Performance comparisons:

- Long term investment objective: Earn a return premium over public equity (Russell 3000 + 3%)
- Recommended primary asset class benchmark:
 Cambridge Associates Global Private Equity & VC Index
- Recommended fund benchmarks: Each fund will be compared to the Cambridge Associates strategy universe for the respective vintage years and each vintage year will be compared to Cambridge Associates Global Private Equity & VC Index

Target Strategy Diversification

Note: MCERA's existing private equity portfolio was modeled using vintage year drawdown/return of capital assumptions patterned after historical category averages. Total fund growth of 5.5%.

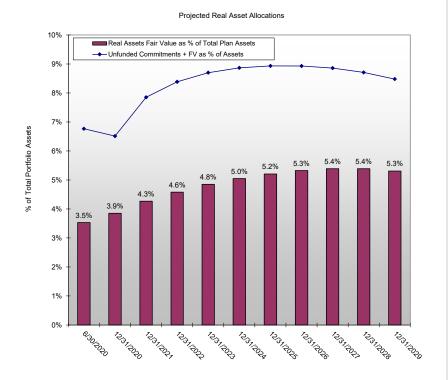

MCERA Real Asset Capital Budget & Implementation Plan

5% fund level target; a decrease from the prior 6% target in 2018

- Increase annual capital budget target from \$10 to \$15 million
 - Range of \$10-\$25 million
 - Distributions have been greater than expected from older infrastructure funds
- Target 2-4 investments, range of \$5-\$10 million per inv
 - Average investment size of \$7 million
 - If an average of 2-4 GP partnership commitments per year, expect a total of 8-16 GP relationships over a 4 year fund raising cycle
- Portfolio targeted to be equally split between infrastructure and energy/natural resource funds

Performance comparisons:

- Long term investment objective: Earn a return premium over inflation (CPI-U + 5%)
- Recommended primary asset class benchmark: 50/50
 Cambridge Global Infrastructure/Cambridge Energy
 Upstream & Royalties and Private Energy Index
- Recommended fund benchmarks: Each fund will be compared to the Cambridge Associates strategy universe for the respective vintage years and each vintage year will be compared to the 50/50 index

Note: MCERA's existing real asset portfolio was modeled using vintage year drawdown/return of capital assumptions patterned after historical category averages. Total fund growth rate of 5.5%.

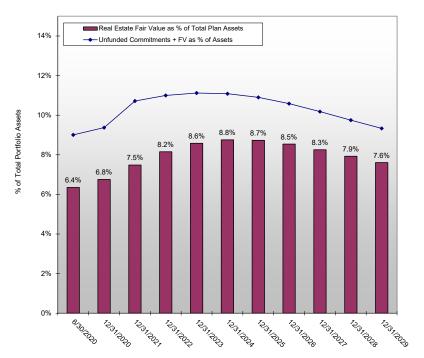

MCERA Real Estate Capital Budget & Implementation Plan

8% fund level target; same as prior target

- Keep annual capital budget at \$15 million
 - Range of \$10-\$25 million
- Target 2-4 investments, range of \$5-\$10 million per inv
 - Average investment size of \$7 million
 - If an average of 2-4 GP partnership commitments per year, expect a total of 8-16 GP relationships over a 4 year fund raising cycle
- Continue using REITS as a substitute until funding private real estate investments is needed; core RE target is 25% of RE portfolio

Performance comparisons:

- Long term investment objective: Earn a return premium over inflation (CPI-U + 5%)
- Recommended primary asset class benchmark: NCREIF NFI-ODCE; revisit over time as the structure of the portfolio changes
- Recommended fund benchmarks: Cambridge Associates strategy universe for the respective vintage years and each vintage year will be compared to Cambridge Associates Global Real Estate Index

Note: MCERA's existing real estate portfolio was modeled using vintage year drawdown/return of capital assumptions patterned after historical averages. Total fund growth rate of 5.5%.

Projected Real Estate Allocations

Capital Markets Outlook & Risk Metrics As of September 30, 2020

Capital Markets Outlook

Takeaways

- September diverged from the prior five months as equity markets across the globe produced moderately negative returns. Additionally, safe haven assets (e.g., US Treasury bonds) were roughly flat.
- Despite negative returns in September, risk-oriented markets have rebounded significantly since the March lows and Q3 was another strong period in aggregate. However, there has been a high degree of divergence among equity regions/styles/capitalizations, and this is exemplified at the extremes with US large cap growth stocks outperforming US small cap value stocks by over 45% thus far in 2020.
- As expected (considering recent Federal Reserve announcements), the entire US Treasury yield curve was effectively unchanged from the end of August to the end of September.
- Conversely, real yields in the US ticked up during September, with the most significant movements occurring at the short end of the curve. The entire real yield curve does, however, remain in negative territory.
- Recent economic data has shown a divergence among regions and metrics. Certain areas (e.g., US housing, China GDP, etc.) have been positive whereas other segments (e.g., US payrolls) are still indicative of broad challenges. Many global authorities appear to be in a period of observation as they attempt to gauge how the economy does, or does not, recover in the short term.

Capital Markets Outlook

Takeaways

- Local/regional US economies are in various stages of reopening, and the timeline for returning to normal levels of economic activity remains uncertain. Relatedly, the aggregate impacts to global GDP due to the COVID-19 pandemic are still unknown. Returning to pre-COVID levels of economic activity is not expected to occur until 2021 at the earliest.
- Implied equity market volatility¹ remained relatively stable throughout September at around 25-30.
 Conversely, our Systemic Risk measure increased during the month, while implied fixed income volatility² declined during September.
- While valuations for several risk-based asset classes appear neutral-to-attractive at first glance, it is important to note that the full impact on corporate earnings and solvencies remains unknown. The path that the global economy will take moving forward is uncertain.
- The Market Sentiment Indicator³ remained green (i.e., positive) at month-end.

¹ As measured by VIX Index.

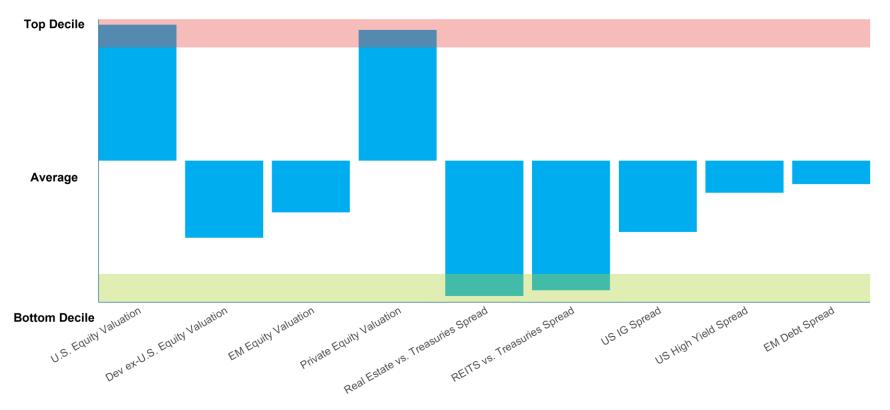

² As measured by MOVE Index.

 $^{^3}$ See Appendix for the rationale for selection and calculation methodology used for the risk metrics.

Capital Markets Outlook & Risk Metrics

Risk Overview/Dashboard (1) (As of September 30, 2020)¹

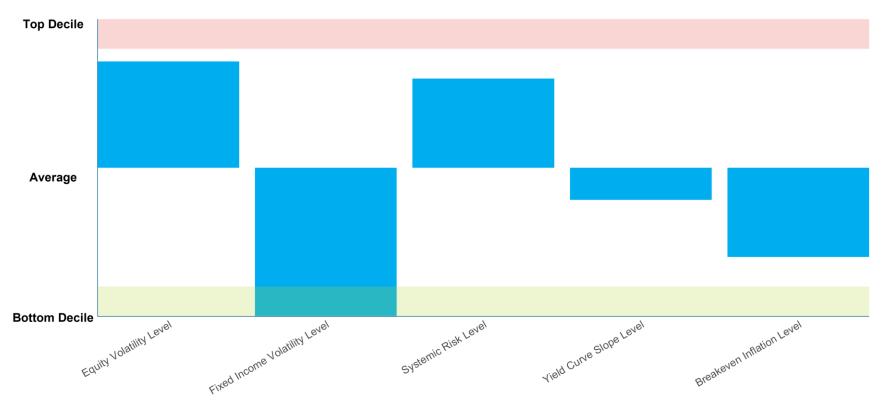

• Dashboard (1) summarizes the current state of the different valuation metrics per asset class relative to their own history.

¹ With the exception of Private Equity Valuation, that is YTD as of December 31, 2019.

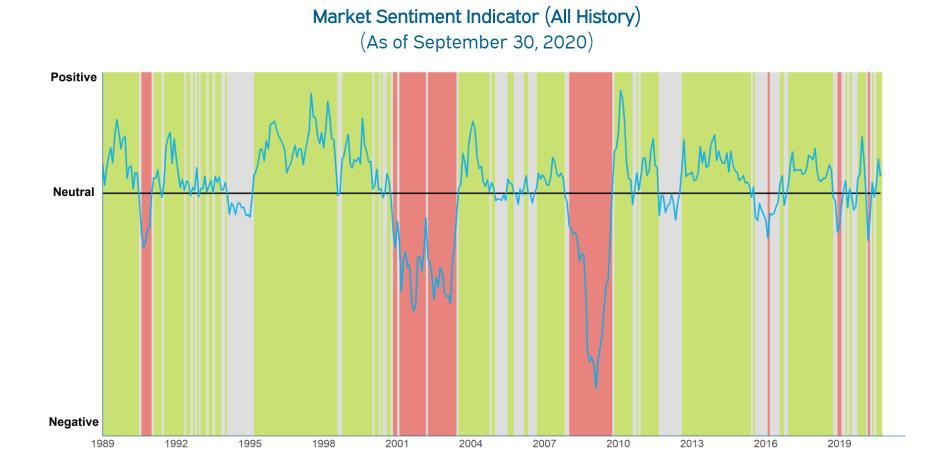

Capital Markets Outlook & Risk Metrics

Risk Overview/Dashboard (2) (As of September 30, 2020)

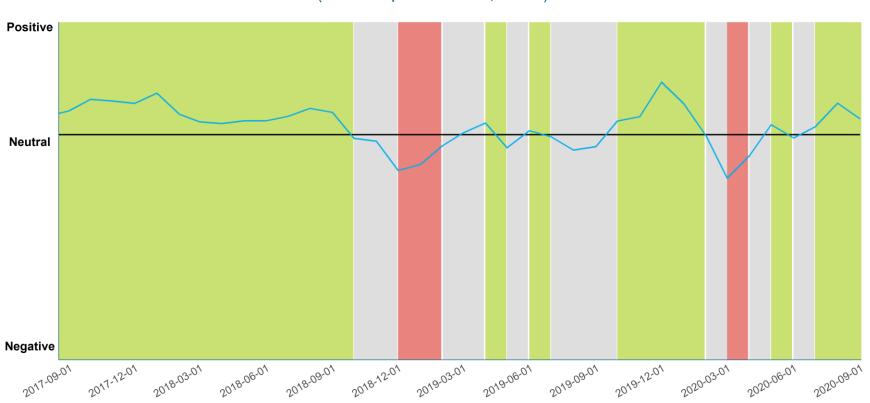

• Dashboard (2) shows how the current level of each indicator compares to its respective history.

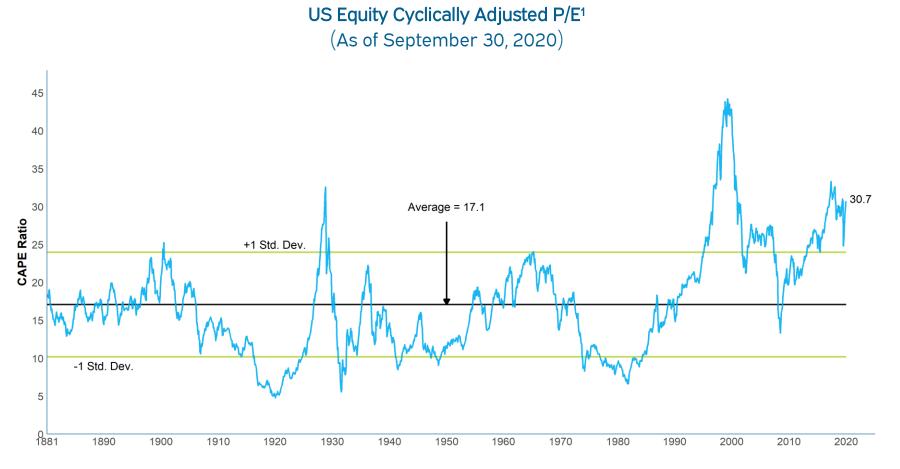

Market Sentiment Indicator (Last Three Years) (As of September 30, 2020)

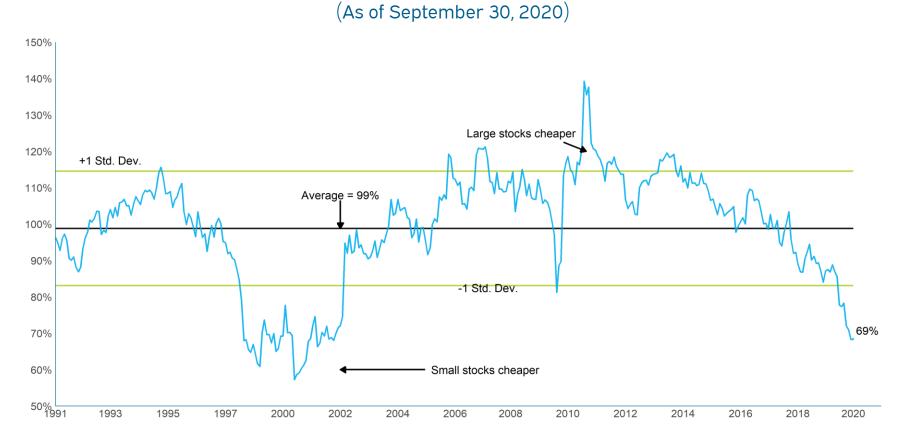

• This chart details one valuation metric for US equities. A higher (lower) figure indicates more expensive (cheaper) valuation relative to history.

¹ US Equity Cyclically Adjusted P/E on S&P 500 Index. Source: Robert Shiller, Yale University, and Meketa Investment Group.

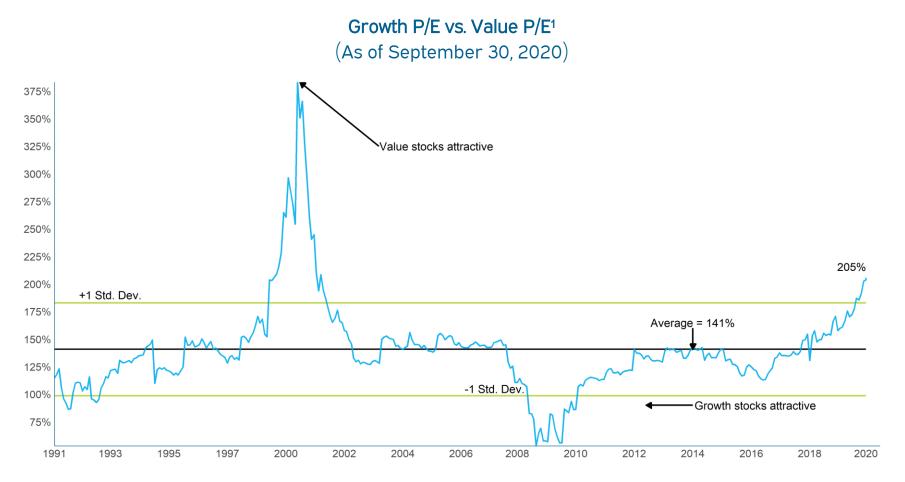

Small Cap P/E vs. Large Cap P/E¹

• This chart compares the relative attractiveness of small cap US equities vs. large cap US equities on a valuation basis. A higher (lower) figure indicates that large cap (small cap) is more attractive.

¹ Small Cap P/E (Russell 2000 Index) vs. Large Cap P/E (Russell 1000 Index) - Source: Russell Investments. Earnings figures represent 12-month "as reported" earnings.

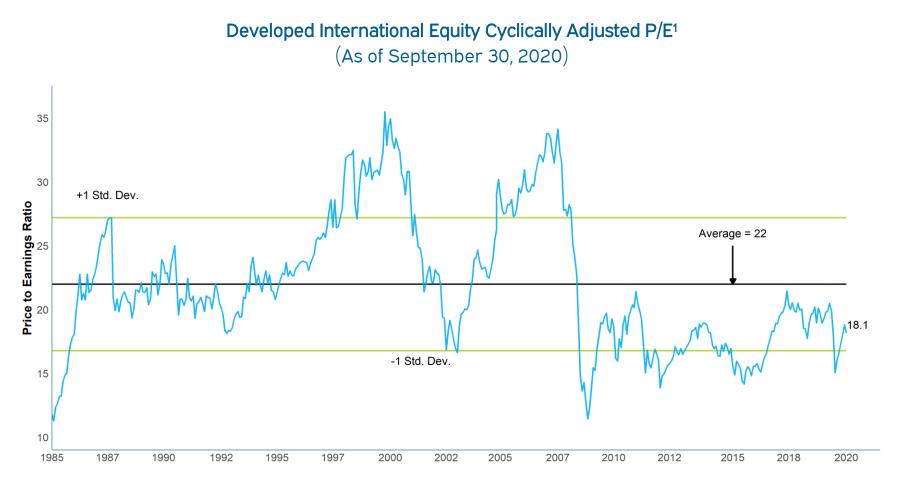

Capital Markets Outlook & Risk Metrics

• This chart compares the relative attractiveness of US growth equities vs. US value equities on a valuation basis. A higher (lower) figure indicates that value (growth) is more attractive.

¹ Growth P/E (Russell 3000 Growth Index) vs. Value (Russell 3000 Value Index) P/E - Source: Bloomberg, MSCI, and Meketa Investment Group. Earnings figures represent 12-month "as reported" earnings.

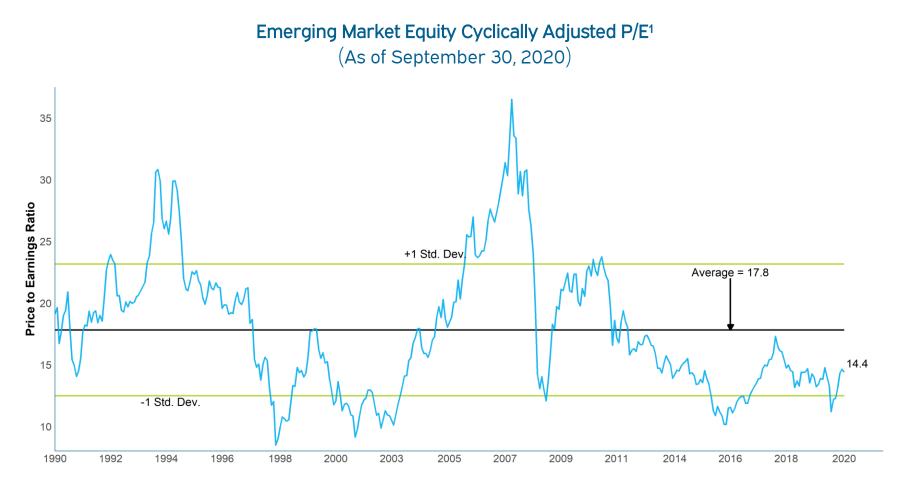

• This chart details one valuation metric for developed international equities. A higher (lower) figure indicates more expensive (cheaper) valuation relative to history.

¹ Developed International Equity (MSCI EAFE ex Japan Index) Cyclically Adjusted P/E – Source: MSCI and Bloomberg. Earnings figures represent the average of monthly "as reported" earnings over the previous ten years.

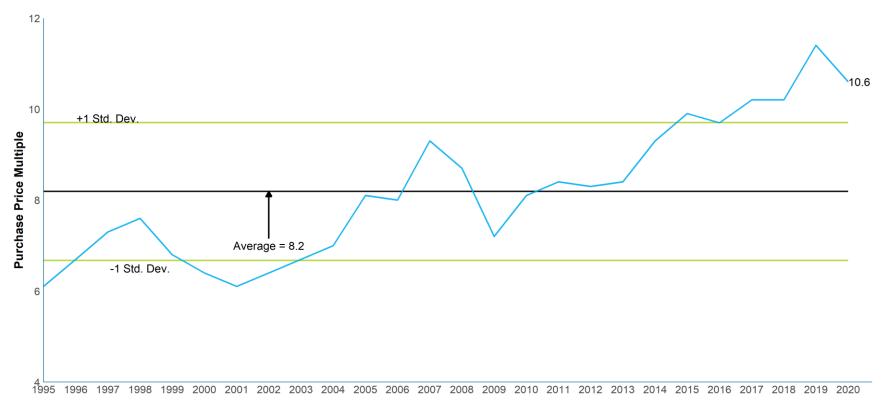

• This chart details one valuation metric for emerging markets equities. A higher (lower) figure indicates more expensive (cheaper) valuation relative to history.

¹ Emerging Market Equity (MSCI Emerging Markets Index) Cyclically Adjusted P/E – Source: MSCI and Bloomberg. Earnings figures represent the average of monthly "as reported" earnings over the previous ten years.

Private Equity Multiples¹ (As of February 29, 2020)²

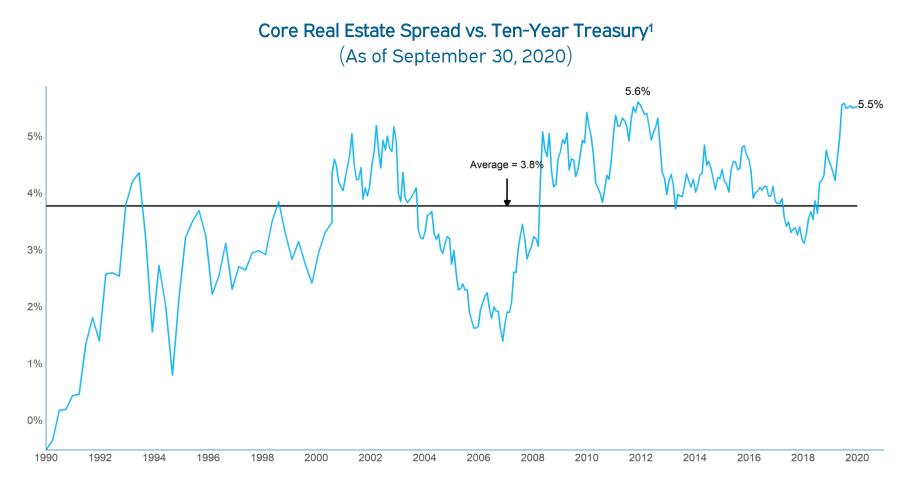

• This chart details one valuation metric for the private equity market. A higher (lower) figure indicates more expensive (cheaper) valuation relative to history.

¹ Private Equity Multiples – Source: S&P LCD Average EBITDA Multiples Paid in All LBOs.

² Annual figures, except for 2020 (YTD).

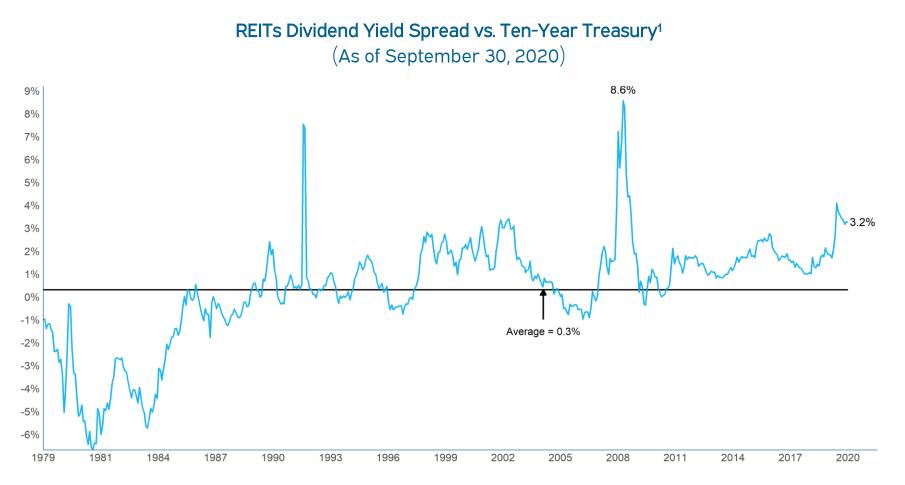

• This chart details one valuation metric for the private core real estate market. A higher (lower) figure indicates cheaper (more expensive) valuation.

¹ Core Real Estate Spread vs. Ten-Year Treasury – Source: Real Capital Analytics, US Treasury, Bloomberg, and Meketa Investment Group. Core Real Estate is proxied by weighted sector transaction based indices from Real Capital Analytics and Meketa Investment Group.

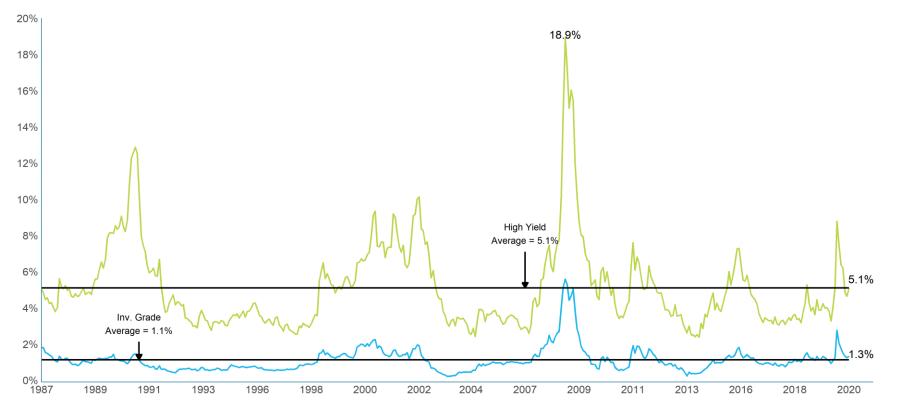

• This chart details one valuation metric for the public REITs market. A higher (lower) figure indicates cheaper (more expensive) valuation.

¹ REITs Dividend Yield Spread vs. Ten-Year Treasury – Source: NAREIT, US Treasury. REITs are proxied by the yield for the NAREIT Equity index.

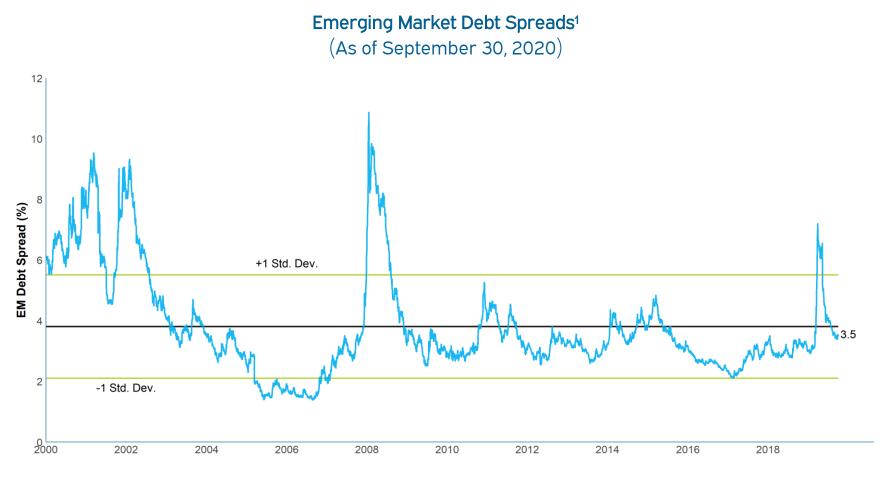

• This chart details one valuation metric for the US credit markets. A higher (lower) figure indicates cheaper (more expensive) valuation relative to history.

¹ Credit Spreads – Source: Barclays Capital. High Yield is proxied by the Barclays High Yield index and Investment Grade Corporates are proxied by the Barclays US Corporate Investment Grade index. Spread is calculated as the difference between the Yield to Worst of the respective index and the 10-Year US Treasury yield.

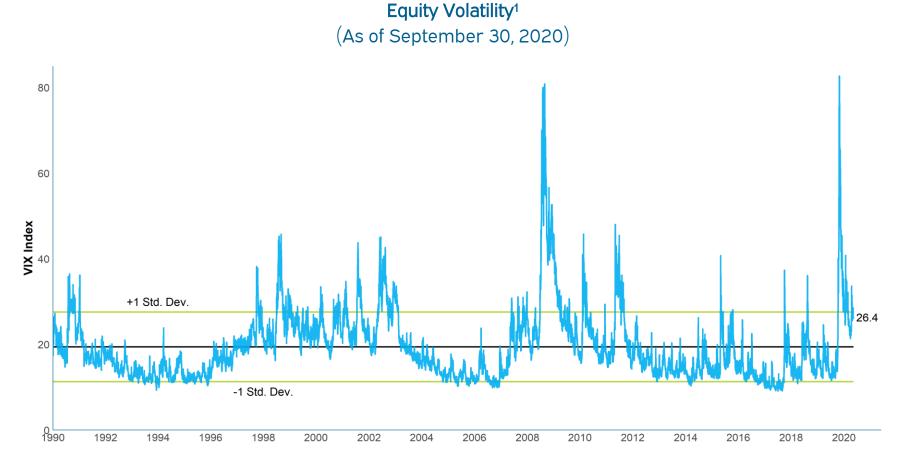

• This chart details one valuation metric for the EM debt markets. A higher (lower) figure indicates cheaper (more expensive) valuation relative to history.

¹ EM Spreads – Source: Bloomberg. Option Adjusted Spread (OAS) for the Bloomberg Barclays EM USD Aggregate Index.

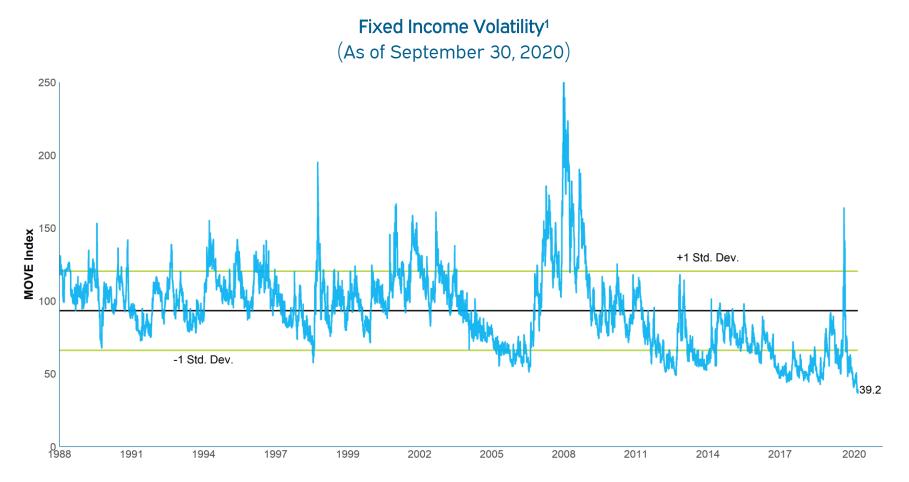

• This chart details historical implied equity market volatility. This metric tends to increase during times of stress/fear and while declining during more benign periods.

¹ Equity Volatility – Source: Bloomberg, and Meketa Investment Group. Equity Volatility proxied by VIX Index, a Measure of implied option volatility for US equity markets.

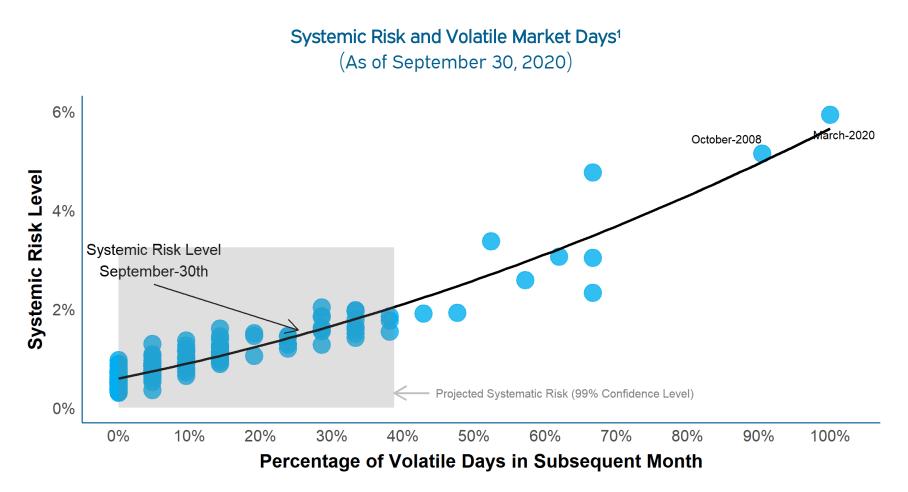

• This chart details historical implied fixed income market volatility. This metric tends to increase during times of stress/fear and while declining during more benign periods.

¹ Fixed Income Volatility – Source: Bloomberg, and Meketa Investment Group. Fixed Income Volatility proxied by MOVE Index, a Measure of implied option volatility for US Treasury markets.

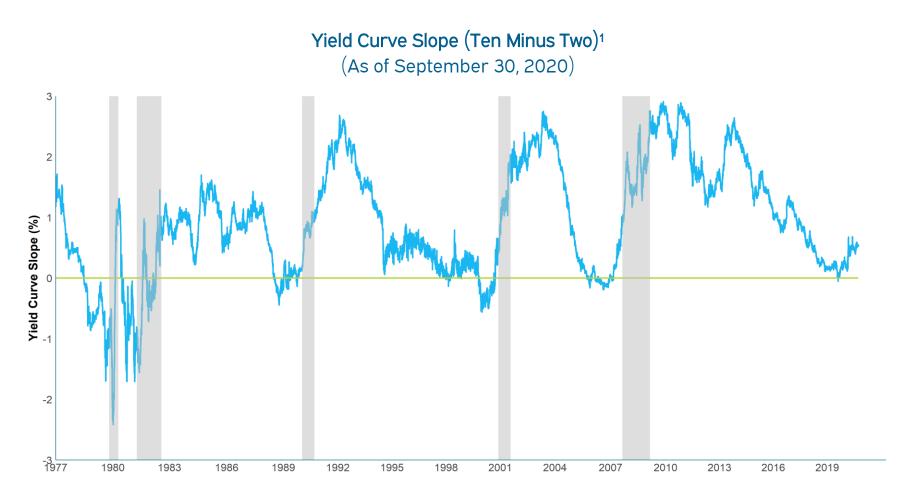

• Systemic Risk is a measure of 'System-wide' risk, which indicates herding type behavior.

¹ Source: Meketa Investment Group. Volatile days are defined as the top 10 percent of realized turbulence, which is a multivariate distance between asset returns.

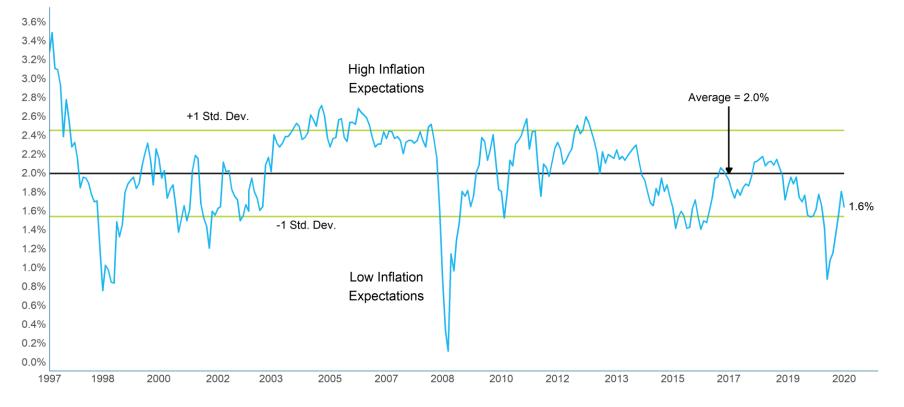

• This chart details the historical difference in yields between ten-year and two-year US Treasury bonds/notes. A higher (lower) figure indicates a steeper (flatter) yield curve slope.

¹ Yield Curve Slope (Ten Minus Two) – Source: Bloomberg, and Meketa Investment Group. Yield curve slope is calculated as the difference between the 10-Year US Treasury Yield and 2-Year US Treasury Yield.

Capital Markets Outlook & Risk Metrics

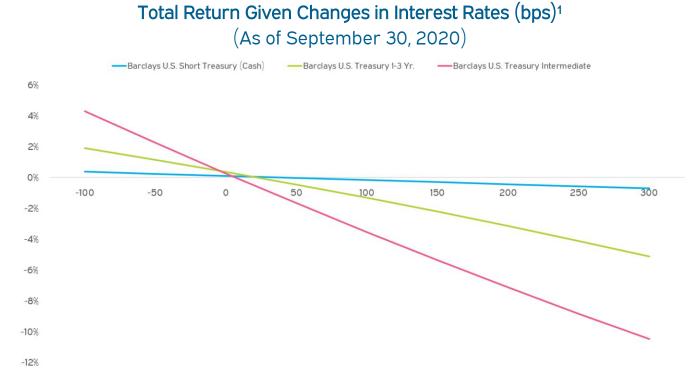

Ten-Year Breakeven Inflation¹ (As of September 30, 2020)

• This chart details the difference between nominal and inflation-adjusted US Treasury bonds. A higher (lower) figure indicates higher (lower) inflation expectations.

¹ Ten-Year Breakeven Inflation – Source: US Treasury and Federal Reserve. Inflation is measured by the Consumer Price Index (CPI-U NSA).

	Total Return for Given Changes in Interest Rates (bps)										Statistics	
	-100	-50	0	50	100	150	200	250	300	Duration	YTW	
Barclays US Short Treasury (Cash)	0.4%	0.2%	0.1%	0.0%	-0.2%	-0.3%	-0.4%	-0.6%	-0.7%	0.27	0.09%	
Barclays US Treasury 1-3 Yr.	1.9%	1.1%	0.4%	-0.5%	-1.3%	-2.2%	-3.2%	-4.1%	-5.1%	1.61	0.35%	
Barclays US Treasury Intermediate	4.3%	2.2%	0.3%	-1.7%	-3.6%	-5.4%	-7.1%	-8.8%	-10.5%	3.92	0.25%	
Barclays US Treasury Long	23.0%	11.6%	1.3%	-7.8%	-15.8%	-22.6%	-28.3%	-32.8%	-36.2%	19.42	1.32%	

¹ Data represents the expected total return from a given change in interest rates (shown in basis points) over a 12-month period assuming a parallel shift in rates. Source: Bloomberg, and Meketa Investment Group.

Long-Term Outlook – 20-Year Annualized Expected Returns¹

• This chart details Meketa's long-term forward-looking expectations for total returns across asset classes.

Meketa Market Sentiment Indicator

Explanation, Construction and Q&A

Meketa has created the MIG Market Sentiment Indicator (MIG-MSI) to <u>complement</u> our valuation-focused Risk Metrics. This measure of sentiment is meant to capture significant and persistent shifts in long-lived market trends of economic growth risk, either towards a risk-seeking trend or a risk-aversion trend.

This appendix explores:

- What is the Meketa Market Sentiment Indicator?
- How do I read the indicator graph?
- How is the Meketa Market Sentiment Indicator constructed?
- What do changes in the indicator mean?

Meketa has created a market sentiment indicator for monthly publication (the MIG-MSI – see below) to complement Meketa's Risk Metrics.

Meketa's Risk Metrics, which rely significantly on standard market measures of relative valuation, often provide valid early signals of increasing long-term risk levels in the global investment markets. However, as is the case with numerous valuation measures, the Risk Metrics may convey such risk concerns long before a market corrections take place. The MIG-MSI helps to address this early-warning bias by measuring whether the markets are beginning to acknowledge key Risk Metrics trends, and / or indicating non-valuation based concerns. Once the MIG-MSI indicates that the market sentiment has shifted, it is our belief that investors should consider significant action, particularly if confirmed by the Risk Metrics. Importantly, Meketa believes the Risk Metrics and MIG-MSI should always be used in conjunction with one another and never in isolation. The questions and answers below highlight and discuss the basic underpinnings of the Meketa MIG-MSI:

What is the Meketa Market Sentiment Indicator (MIG-MSI)?

• The MIG-MSI is a measure meant to gauge the market's sentiment regarding economic growth risk. Growth risk cuts across most financial assets, and is the largest risk exposure that most portfolios bear. The MIG-MSI takes into account the momentum (trend over time, positive or negative) of the economic growth risk exposure of publicly traded stocks and bonds, as a signal of the future direction of growth risk returns; either positive (risk seeking market sentiment), or negative (risk averse market sentiment).

How do I read the Meketa Market Sentiment Indicator graph?

- Simply put, the MIG-MSI is a color-coded indicator that signals the market's sentiment regarding economic growth risk. It is read left to right chronologically. A green indicator on the MIG-MSI indicates that the market's sentiment towards growth risk is positive. A gray indicator indicates that the market's sentiment towards growth risk is neutral or inconclusive. A red indicator indicates that the market's sentiment towards growth risk is neutral or inconclusive. A red indicator indicates that the market's sentiment towards growth risk is neutral or inconclusive. A red indicator indicates that the market's sentiment towards growth risk is neutral or inconclusive in the graph is the level of the MIG-MSI. The degree of the signal above or below the neutral reading is an indication the signal's current strength.
- Momentum as we are defining it is the use of the past behavior of a series as a predictor of its future behavior.

How is the Meketa Market Sentiment Indicator (MIG-MSI) Constructed?

- The MIG-MSI is constructed from two sub-elements representing investor sentiment in stocks and bonds:
 - Stock return momentum: Return momentum for the S&P 500 Equity Index (trailing 12-months)
 - Bond yield spread momentum: Momentum of bond yield spreads (excess of the measured bond yield over the identical duration US Treasury bond yield) for corporate bonds (trailing 12-months) for both investment grade bonds (75% weight) and high yield bonds (25% weight).
 - Both measures are converted to Z-scores and then combined to get an "apples to apples" comparison without the need of re-scaling.
- The black line reading on the graph is calculated as the average of the stock return momentum measure and the bonds spread momentum measure.¹ The color reading on the graph is determined as follows:
 - If both stock return momentum and bond spread momentum are positive = GREEN (positive)
 - If one of the momentum indicators is positive, and the other negative = GRAY (inconclusive)
 - If both stock return momentum and bond spread momentum are negative = RED (negative)

¹ Momentum as we are defining it is the use of the past behavior of a series as a predictor of its future behavior.

[&]quot;Time Series Momentum" Moskowitz, Ooi, Pedersen, August 2010. http://pages.stern.nyu.edu/~lpederse/papers/TimeSeriesMomentum.pdf

What does the Meketa Market Sentiment Indicator (MIG-MSI) mean? Why might it be useful?

There is strong evidence that time series momentum is significant and persistent. In particular, across an extensive array of asset classes, the sign of the trailing 12-month return (positive or negative) is indicative of future returns (positive or negative) over the next 12-month period. The MIG-MSI is constructed to measure this momentum in stocks and corporate bond spreads. A reading of green or red is agreement of both the equity and bond measures, indicating that it is likely that this trend (positive or negative) will continue over the next 12 months. When the measures disagree, the indicator turns gray. A gray reading does not necessarily mean a new trend is occurring, as the indicator may move back to green, or into the red from there. The level of the reading (black line) and the number of months at the red or green reading, gives the user additional information on which to form an opinion, and potentially take action.

Performance Highlights As of September 30, 2020

Performance Highlights

Market Review and Performance Summary for September 2020

- Financial markets were down for the month as concerns about a resurgence of Covid-19 globally, and talks about a further stimulus package in the US stalled.
- Equity market volatility was notably higher this month as expressed by an intra-month VIX index high of 33.6.
- Interest rates across the yield curve were mostly unchanged from the previous month.

As of September 30, 2020, total assets for the Merced CERA Portfolio stood at \$963.8 million.

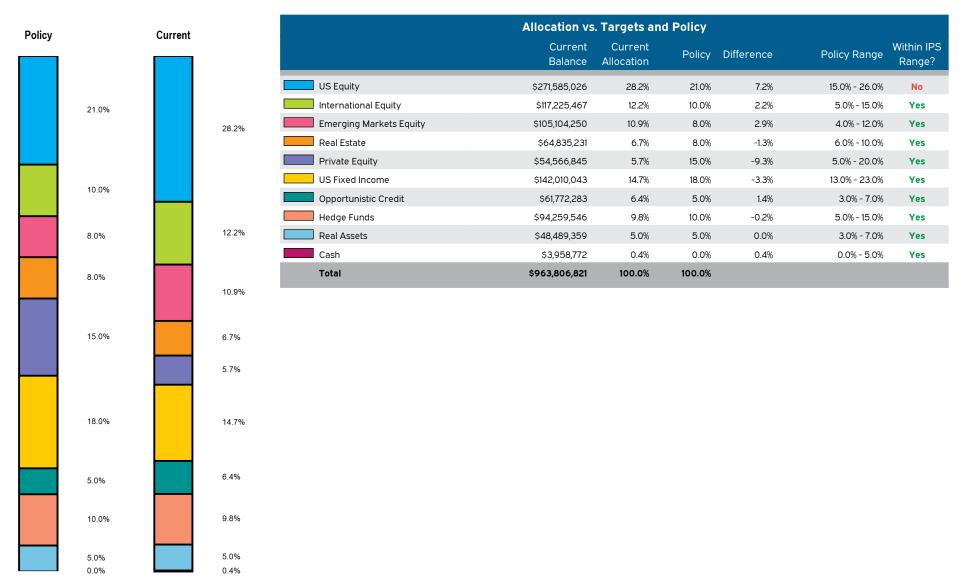

- Merced CERA reported an overall monthly return of -1.2%, with positive performance mostly from alternatives.
- Within the portfolio, positive performance was led by Private Equity (+5.4%), which is reported on a quarter lag. Of the public asset classes, opportunistic credit (+0.2%) led positive performance, while US Equity was down the most (-3.7%).

CHANGES TO ANY ASSUMPTIONS MAY HAVE A MATERIAL IMPACT ON FORWARD - LOOKING STATEMENTS, FORECASTS, PROJECTIONS, VALUATIONS, VALUATIONS, OR RESULTS IN THIS PRESENTATION ARE BASED UPON CURRENT, PROJECTIONS, VALUATIONS, OR RESULTS. ACTUAL RESULTS MAY THEREFORE BE MATERIALLY DIFFERENT FROM ANY FORECASTS, PROJECTIONS, VALUATIONS, OR RESULTS IN THIS PRESENTATION.

PERFORMANCE DATA CONTAINED HEREIN REPRESENT PAST PERFORMANCE. PAST PERFORMANCE IS NO GUARANTEE OF FUTURE RESULTS.

Credit Risk: Refers to the risk that the issuer of a fixed income security may default (i.e., the issuer will be unable to make timely principal and/or interest payments on the security.)

Duration: Measure of the sensitivity of the price of a bond to a change in its yield to maturity. Duration summarizes, in a single number, the characteristics that cause bond prices to change in response to a change in interest rates. For example, the price of a bond with a duration of three years will rise by approximately 3% for each 1% decrease in its yield to maturity. Conversely, the price will decrease 3% for each 1% increase in the bond's yield. Price changes for two different bonds can be compared using duration. A bond with a duration of six years will exhibit twice the percentage price change of a bond with a three-year duration. The actual calculation of a bond's duration is somewhat complicated, but the idea behind the calculation is straightforward. The first step is to measure the time interval until receipt for each cash flow (coupon and principal payments) from a bond. The second step is to compute a weighted average of these time intervals. Each time interval is measured by the present value of that cash flow. This weighted average is the duration of the bond measured in years.

Information Ratio: This statistic is a measure of the consistency of a portfolio's performance relative to a benchmark. It is calculated by subtracting the benchmark return from the portfolio return (excess return), and dividing the resulting excess return by the standard deviation (volatility) of this excess return. A positive information ratio indicates outperformance versus the benchmark, and the higher the information ratio, the more consistent the outperformance.

Jensen's Alpha: A measure of the average return of a portfolio or investment in excess of what is predicted by its beta or "market" risk. Portfolio Return- [Risk Free Rate+Beta*(market return-Risk Free Rate)].

Market Capitalization: For a firm, market capitalization is the total market value of outstanding common stock. For a portfolio, market capitalization is the sum of the capitalization of each company weighted by the ratio of holdings in that company to total portfolio holdings; thus it is a weighted-average capitalization. Meketa Investment Group considers the largest 65% of the broad domestic equity market as large capitalization, the next 25% of the market as medium capitalization, and the smallest 10% of stocks as small capitalization.

Market Weighted: Stocks in many indices are weighted based on the total market capitalization of the issue. Thus, the individual returns of higher market-capitalization issues will more heavily influence an index's return than the returns of the smaller market-capitalization issues in the index.

Maturity: The date on which a loan, bond, mortgage, or other debt/security becomes due and is to be paid off.

Prepayment Risk: The risk that prepayments will increase (homeowners will prepay all or part of their mortgage) when mortgage interest rates decline; hence, investors' monies will be returned to them in a lower interest rate environment. Also, the risk that prepayments will slow down when mortgage interest rates rise; hence, investors will not have as much money as previously anticipated in a higher interest rate environment. A prepayment is any payment in excess of the scheduled mortgage payment.

Price-Book Value (P/B) Ratio: The current market price of a stock divided by its book value per share. Meketa Investment Group calculates P/B as the current price divided by Compustat's quarterly common equity. Common equity includes common stock, capital surplus, retained earnings, and treasury stock adjusted for both common and nonredeemable preferred stock. Similar to high P/E stocks, stocks with high P/B's tend to be riskier investments.

Price-Earnings (P/E) Ratio: A stock's market price divided by its current or estimated future earnings. Lower P/E ratios often characterize stocks in low growth or mature industries, stocks in groups that have fallen out of favor, or stocks of established blue chip companies with long records of stable earnings and regular dividends. Sometimes a company that has good fundamentals may be viewed unfavorably by the market if it is an industry that is temporarily out of favor. Or a business may have experienced financial problems causing investors to be skeptical about is future. Either of these situations would result in lower relative P/E ratios. Some stocks exhibit above-average sales and earnings growth or expectations for above average growth. Consequently, investors are willing to pay more for these companies' earnings, which results in elevated P/E ratios. In other words, investors will pay more for shares of companies whose profits, in their opinion, are expected to increase faster than average. Because future events are in no way assured, high P/E stocks tend to be riskier and more volatile investments. Meketa Investment Group calculates P/E as the current price divided by the I/B/E/S consensus of twelve-month forecast earnings per share.

Quality Rating: The rank assigned a security by such rating services as Fitch, Moody's, and Standard & Poor's. The rating may be determined by such factors as (1) the likelihood of fulfillment of dividend, income, and principal payment of obligations; (2) the nature and provisions of the issue; and (3) the security's relative position in the event of liquidation of the company. Bonds assigned the top four grades (AAA, AA, A, BBB) are considered investment grade because they are eligible bank investments as determined by the controller of the currency.

Sharpe Ratio: A commonly used measure of risk-adjusted return. It is calculated by subtracting the risk free return (usually three-month Treasury bill) from the portfolio return and dividing the resulting excess return by the portfolio's total risk level (standard deviation). The result is a measure of return per unit of total risk taken. The higher the Sharpe ratio, the better the fund's historical risk adjusted performance.

STIF Account: Short-term investment fund at a custodian bank that invests in cash-equivalent instruments. It is generally used to safely invest the excess cash held by portfolio managers.

Standard Deviation: A measure of the total risk of an asset or a portfolio. Standard deviation measures the dispersion of a set of numbers around a central point (e.g., the average return). If the standard deviation is small, the distribution is concentrated within a narrow range of values. For a normal distribution, about two thirds of the observations will fall within one standard deviation of the mean, and 95% of the observations will fall within two standard deviations of the mean.

Style: The description of the type of approach and strategy utilized by an investment manager to manage funds. For example, the style for equities is determined by portfolio characteristics such as price-to-book value, price-to-earnings ratio, and dividend yield. Equity styles include growth, value, and core.

Tracking Error: A divergence between the price behavior of a position or a portfolio and the price behavior of a benchmark, as defined by the difference in standard deviation.

Yield to Maturity: The yield, or return, provided by a bond to its maturity date; determined by a mathematical process, usually requiring the use of a "basis book." For example, a 5% bond pays \$5 a year interest on each \$100 par value. To figure its current yield, divide \$5 by \$95—the market price of the bond—and you get 5.26%. Assume that the same bond is due to mature in five years. On the maturity date, the issuer is pledged to pay \$100 for the bond that can be bought now for \$95. In other words, the bond is selling at a discount of 5% below par value. To figure yield to maturity, a simple and approximate method is to divide 5% by the five years to maturity, which equals 1% pro rata yearly. Add that 1% to the 5.26% current yield, and the yield to maturity is roughly 6.26%.

5% (discount)1% pro rata, plus6.26% (yield to maturity)5 (yrs. to maturity)5.26% (current yield)=6.26% (yield to maturity)

Yield to Worst: The lowest potential yield that can be received on a bond without the issuer actually defaulting. The yield to worst is calculated by making worst-case scenario assumptions on the issue by calculating the returns that would be received if provisions, including prepayment, call, or sinking fund, are used by the issuer.

NCREIF Property Index (NPI): Measures unleveraged investment performance of a very large pool of individual commercial real estate properties acquired in the private market by tax-exempt institutional investors for investment purposes only. The NPI index is capitalization-weighted for a quarterly time series composite total rate of return.

NCREIF Fund Index - Open End Diversified Core Equity (NFI-ODCE): Measures the investment performance of 28 open-end commingled funds pursuing a core investment strategy that reflects funds' leverage and cash positions. The NFI-ODCE index is equal-weighted and is reported gross and net of fees for a quarterly time series composite total rate of return.

Merced County Employees' Retirement Association (MercedCERA) RETIREMENT BOARD AGENDA ITEM

DATE:	October 22, 2020
TO:	MercedCERA Board of Retirement
FROM:	Martha Sanchez, Fiscal Manager of Benefits and Administration
SUBJECT:	Adoption of Pay Code for Merced County.
ITEM NUMBER:	4
ITEM TYPE:	Action

STAFF RECOMMENDATION:

1. Adoption of pay code 3455 Strike Team as non-pensionable pay code for Merced County. (Pay code 455 for MercedCERA retirement system identification).

DISCUSSION:

On September 29, 2020, the Merced County Board of Supervisors approved the addition of a Strike Team special pay code. Pay code 3455 (pay code 455 for MercedCERA retirement system identification) will be used to provide pay for Extra Help Paid Call Firefighters that are assigned to work on an out of county strike team. The Strike Team differential is to be paid at the rate of \$8.00 per hour for actual hours worked when assigned to work on an out of county strike team. The pensionable.

Staff recommends the following:

1. Adoption of pay code 3455 Strike Team as non-pensionable pay code for Merced County. (Pay code 455 for MercedCERA retirement system identification).

MCERA Pay Codes Updated: August 13, 2020

1

[1] This item may be includable to the limited extent that such pay was earned and payable during the member final compensation period, but was not taken during that period.

The differentials provided for in Pay Codes 365 and 366 apply to the same duties, but vary according to the date the employee began receiving it, with those started before January 10, 1994 receiving 1.5 ranges and others receiving 1.0 range.

pj The pensionable portion of the vacation sell back for any member may not exceed the limit that applies to any group or class or most comparable class if only one member of a class.

 Supreme Court ruling 7/30/2020 exludes codes as pensionable. Prior to ruling, exclusion of these paycodes was stayed until July 12, 2014. Effective July 12, 2014 items were not compensation earnable. January 8, 2018 court decision made some of these compensation earnable for Tier 1 through 3 members (specifically vacation payout earnings), except for those reciprocal members (Tier 2R and 3R) starting with MCERA system on Feburary 8, 2018, or after.

Numeric Wage codes represent pay codes for County, Cemetery,& Solid Waste. Alpha Wage Codes represent pay codes for Courts. Numeric Wage codes representing pay codes for County and Cemetery are four digit codes, all preceeded with a number "3". However, CPAS pension administration system allows three digit codes.

SACRS VOTING PROXY FORM

The following are authorized by the _____ County Retirement Board to vote on behalf of the County Retirement System at the upcoming SACRS Conference

(if you have more than one alternate, please attach the list of alternates in priority order):

 Voting Delegate
 Alternate Voting Delegate

These delegates were approved by the Retirement Board on _____ / _____ / _____.

The person authorized to fill out this form and submit electronically on behalf of the Retirement Board:

Signature:	
Print Name:	
Position:	
Date:	

Please send your system's voting proxy by October 31, 2020 to Sulema H. Peterson, SACRS Executive Director at <u>Sulema@sacrs.org</u>.
